Our team manages Qlik environments on behalf of our customers and take responsibility for data, applications, identity & access security, performance, and configuration. We maintain, upgrade, and patch the software to ensure optimal health and performance of the systems. We recover from planned snapshot backups of data, servers, and configurations to get systems back online. We operate from a playbook of best practices and routines from our experiencing managing Qlik environments for years. We partner with our customers and their other cloud providers to deliver a sustainable solution.
